Create Flask Project:

The screenshot shows a terminal window with the title bar "gokul@gokul: ~/dev/application". The terminal output is as follows:

```
(gokul@gokul)-[~/dev/application]
$
(gokul@gokul)-[~/dev/application]
$ pip3 install Flask
Defaulting to user installation because normal site-packages is not writeable
Requirement already satisfied: Flask in /usr/lib/python3/dist-packages (2.0.3)
(gokul@gokul)-[~/dev/application]
$
(gokul@gokul)-[~/dev/application]
$
```

Overlaid on the terminal is a web application interface. It features a top navigation bar with "Home" and "Register" buttons. Below this is a login form with two input fields: "Enter username" and "Enter password", followed by a "Login" button.
